PROFILE

International master's student based in Sweden with a background in Sociology, Data Analytics and software development. Native Spanish speaker with IELTS Academic C1 English and experience combining client communication, business development, technology and problem solving. Co-founder of a small AI and automation company, with hands-on responsibility for clients, marketing, software delivery and day-to-day operations.

EXPERIENCE

Co-Founder & Software / Automation Developer

Babieca Tech | 2026 – Present

- Manage client communication, requirements, product delivery, marketing and software development across an AI and automation startup.
- Built an end-to-end operations platform for a fishing cofradía: delivery notes ingested from email, OCR extraction, cross-validation against each supplier's history, per-species margin control and a client portal — 12 admin routes, 11 portal routes, 57 components with 55 unit tests.
- Built RAG-based chatbots, voice agents and automated workflows connecting websites, Supabase, APIs and internal dashboards.
- Built and operate a suite of **10 automation products in production** — 71 admin dashboards, 26 client portals, 15 API endpoints, 23 database migrations, 159 automated tests and 8 CI pipelines.
- Produce brand and product video programmatically with Remotion (39 compositions, 258 reusable motion components), rendered on self-hosted infrastructure — no editor and no designer dependency.
- Work independently across technical and non-technical tasks, from initial problem analysis to implementation and client delivery.

Data Analyst

RockStar Data | Aug 2024 – Mar 2025

- Worked with customer data from CRM, ERP and POS systems and improved reliability through automated validation.
- Defined and communicated KPIs supporting pricing, cost and profitability decisions.

EDUCATION

MSc Computer Social Science (CSS)
